DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 26-50 & 55, drawn to a jet injector and method for forming a thin jet stream of a liquid medical drug, classified in class 604, subclass 68.
- II. Claims 51-54, drawn to a method of making a jet injector, classified in class 604, subclass 500.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the jet injector can be made utilizing steps of bonding and adhering.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
